- Precision mitered, Fusion welded corners
- Full screen overlap
- 3 1/4" frame
- 7/8" white S-Class Super Spacer sealed unit
- Interior glazing stops

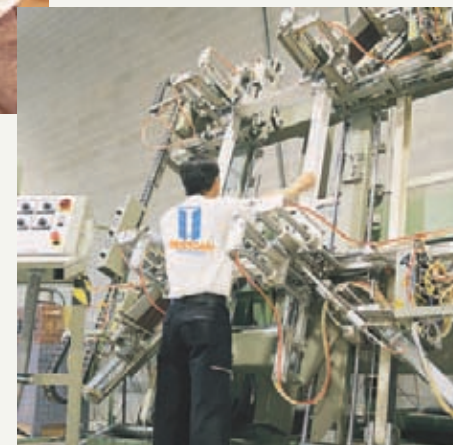

Style, Selection & Value...

Building a Better Window...

All BESTCAN windows are manufactured with the latest hi-tech machinery ensuring tight, exact sizes and excellent quality. Casement/Awning sashes and frames are welded in the same cycle. Both Double Hung sashes are welded at the same time in a 4-point horizontal welder.

Designed for style!

Awning

Ideal alone or in combination with fixed panels for spectacular picture windows. The Awning features the same energy savings, and technology of the Casement window.

- Triple weather seals
- Scissor arm operator
- Fusion welded corners
- Premium lever locks (standard)
- Optional multi-point lock system
- Full screen overlap
- 3 1/4" frame
- 7/8" white S-Class Super Spacer sealed unit
- Interior glazing stops

Custom Shapes & Sizes

Custom shapes are available as stand-alone or in combination with Fixed and venting Casements, Double Hungs and Sliders.

BESTCAN windows are also available as custom picture windows in various sizes, shapes and styles. Combine Casements or Double Hungs with round or elliptical windows for unlimited designs and styles to suit your home.

Cleaning made easy with our Exclusive NEAT Glass

Practically Cleans Itself
It starts with the sun. The coating reacts chemically with the sun's UV rays to cause organic materials on the glass to decompose. It works even on cloudy days as 80% of UV radiation still gets through the clouds. Cardinal's sputtering process (not a soft film) allows more visible light transmission than any comparable product.

Solar Bond™ Colours

Standard window colours include: White, Cream, SDT, High Gloss Brown, Commercial Brown, Hickory, Sable and Grey. Choose a standard or custom colour and we'll guarantee the finish for 15 years.

White / Cream / SDT / High Gloss Brown / Commercial Brown / Hickory / Sable / Grey
Colours may not be exactly as shown.

Exclusive Polyresin 3®

It's the work that goes into each BESTCAN product that sets it apart.

- Each window starts with only virgin vinyl, manufactured from pellets instead of powder for increased durability.
- Our vinyl, Polyresin 3, is engineered for its superior weathering and impact resistance, and outperforms our competitors' BlueWhite vinyl in both hot and cold climates.
- Polyresin 3 is also a softer colour and looks more natural than BlueWhite.

**Exclusive
BESTCAN
S-Class White
Super Spacer®**

Maximum Warmth

BESTCAN windows are constructed with exclusive Super Spacer and Warm Edge technology to increase thermal performance.

Super Spacer also reduces condensation, which protects the interior of the window from mold for mildew.

You'll notice the difference because Super Spacer technology actually leads to fewer warranty issues.

Reduce Condensation

All metal spacer bars show excessive condensation even in the mildest winters.

Thermally broken metal spacer bar shows a slight improvement but considerable condensation still exists.

Super-Spacer substantially reduces surface condensation significantly improving visibility and comfort levels during the winter months.

BESTCAN windows feature an exclusive white Super Spacer that is designed to save energy and enhance the overall esthetics of the windows.

Super Spacer®

The BESTCAN Window system is one of the best window systems being offered in today's market. The window system encompasses superior quality, performance and innovative features not found in other window systems and is guaranteed to last a lifetime.

Compared to Hard Coat Low-E

- Superior Emissivity: (Sending Heat In or Out)
- High R - Values: (R 4.2 compared to R 3.3)
- Light Transmission: (Same as Clear glass)
- U.V. Resistance: (Filters out 84% U.V. Rays)
- Haze: Compared to Low-E (No Haze)

**Maximum R-Value
LoE² & Argon**

In the summer, LoE² prevents solar heat gain and reduces ultraviolet transmission.

In the winter, the warm room air is deflected back inside the house.

BESTCAN windows are a clear choice for higher R and lower UV values.

It helps your customer in two ways:

It keeps out 84% UV rays, which can fade and damage furnishings as well as pose a health hazard. It also deflects heat, keeping it out in the summer and inside in the winter, making their home more comfortable and cheaper to heat and cool.

A beautiful BESTCAN Ultra-R 2000 Bow window adds space and light while providing a great outdoor view.

Family Owned and Operated since 1970
A ONCE IN A LIFETIME WINDOW

All BESTCAN windows are backed by our exclusive non-prorated transferable Lifetime Warranty.

This warranty is your assurance that our products meet and exceed our customers expectations.

North American Window Certification

BESTCAN UltraR Double Hung window gives you new meaning to a traditional look. Designed for years of satisfying performance with eye catching appeal.

Money is not all you're saving. . .

If you like the idea of saving money on your heating and cooling bills — and having a more comfortable home — then you'll surely be interested in windows and doors that are ENERGY STAR® qualified.

BESTCAN vinyl windows that incorporate low-emissivity (LoE²) insulating glass system pass ENERGY STAR® requirements and therefore carry ENERGY STAR® labels.

The ENERGY STAR® label can be affixed only to products that meet specific U-Value and shading coefficient ratings for one or more regions of Canada & the U.S. These ratings are achieved through independent testing done to NFRC* standards.

ENERGY STAR® qualified windows can help reduce your utility bills up to 40%.
